# 🎉 DFY TRAFFIC

🕰️ **Quick Start Guide** 🕰️

Welcome to DFY Traffic.

This short and sweet guide will get you setup with the AI in minutes!

🔥🔥 **You made a smart choice - now let's get going, in seconds** 👇

1. Accessing Everything - Members Area

To visit the **DFY Traffic members area,** log in to your WarriorPlus account - and click your **username** in the red + click "**purchase history**":

There you will find all the recent purchases you made on Warrior - including links to all the members pages.

2. Getting Started With The Software

You will be able to access all the software tools. **To access DFY Traffic, simply create an account. Be sure to use the email address you purchased with on W+.**

To build the recommended website for DFY Traffic, use our WordPress theme (if you do not want to setup WordPress, or do not have a domain/hosting, you can simply use our [DFY website setup service here](#)).

3. Getting Updates (To DFY Traffic)

AI is constantly changing (in the last few weeks we have seen GPT Vision, MidJourney Variations, Canva Magic AI, Runway Inpainting and more!). I do regular updates to

the core AI tools, free training videos on AI updates, and also webinars with new training and tactics.

To ensure you get access to all this, hit reply to my "welcome email". I will send you a bonus AND it will ensure my email is whitelisted.

4. REQUIRED To Use DFY Traffic AI

DFY Traffic is a software that uses a complex sequence of tools to give Chat-GPT access to Google search (to then create better content than is currently ranking). We use our own accounts and software to handle most queries, but there are two specific accounts you will need to create to use the software:

A) CONNECT TO CHAT-GPT
DFY Traffic connects to Chat-GPT, an AI that is owned by OpenAI. You will need an "API key" to use the tool. Therefore, if you don't already have an account with OpenAI, you will need to do the following:

1. Create an account with them https://platform.openai.com/account/api-keys
2. Get an API key - https://platform.openai.com/account/api-keys
3. Insert the API key into the settings page of DFY Traffic and hit save
4. Then you have connected DFY Traffic to the AI. Done.

Once you have completed this step, your copy of Chat-GPT is now connected to all of the top niches and keywords on Google! There's nothing else to do.

B) CONNECT TO SERP-API
DFY Traffic connects to Google search, using a service called SerpAPI. This is free for 100 searches per month, which should be more than sufficient for 99% of users. This is a very powerful service, used by companies like IBM, AirBnB, Shopify & Harvard.
If you don't already have an account with Serp-API, you will need to do the following:

1. Create an account with them https://serpapi.com/
2. Get an API key - https://serpapi.com/manage-api-key
3. Insert the API key into the settings page of DFY Traffic and hit save
4. Then you have connected DFY Traffic to Web Search. Done.

Once you have completed these stacks, your copy of Chat-GPT is now connected to its own search engine and web browser! There's nothing else to do.

5. My "AI Tech Stack" - November 2023

OK here is my AI tech stack for October 2023, in the rough order which I use them:

1. **ChatGPT Plus - https://chat.openai.com/chat** *UPDATED*
   I use this for a near-infinite range of purposes such as creating software, writing sales copy, and doing technical research. If you have $20/month I would **definitely** upgrade to "Chat-GPT Plus" (click on "your account" on the left) as it gives you access to GPT-4 which is the most powerful model **AND** now also gives you GPT Plugins, Bing Browser - **AND** now Dalle-3 **AND** Multi-Modal too! Yes! Multi modal = GPT now has vision included so you can even upload an image and ask GPT about it. Their iOS app now has voice-chat, and well.. It's difficult to overstate how impactful GPT-4 has been to my business this year. As the creator of the #2 pick on my list I can say that nothing comes close to GPT Plus (after all, even my Remixable runs on GPT4)

2. **RemixableAI - http://remixable.ai/** *UPDATED*
   My own software suite, which is now approaching $300k in dev costs and basically automates every aspect of running a digital product business (either as an affiliate, Youtuber, list builder or product owner). This now has Chat-GPT fully integrated into the tool (for copywriting) along with 40+ training videos on AI. If you want to sell your own product this is indispensable. But I use this to make most of my webpages and videos. I really can't stress enough how much of a level up Remixable AI is for everything I do)

3. **Dalle 3- https://www.bing.com/images/create (AND now inside Chat GPT Plus!)** *UPDATED*
   In the summer of 2022, Chat GPT was still six months away. But OpenAI's first big viral splash was "DallE", their image generation tool. Then came Dalle-2, and then at the end of September Dalle-3 dropped, initially via Bing (login to your Microsoft account and hit the above link). So.. is DallE better than MidJourney? In some ways.. Yes. It handles text 100x better (and almost as well as https://ideogram.ai/ which is free, and best-in-class at AI logos and text). It is very good at ecovers (try prompt like "software ecover box with text "YOURPRODUCT" with robot icon"). It is also VERY good at turning weird text prompts into pics (since it is powered by Chat-GPT). GPT Plus has DALLE-3 inside its account now, so if you have a GPT Plus account (you should!) then you now have the #1 language AI AND the #1 image AI in one, which pushes our previous #3 down a spot...

4. **MidJourney - https://www.midjourney.com/ *UPDATED***

The top AI graphics tool. In November, we *finally* have a web version, but you still can't create images on there yet (only on their Discord app). As of 1st November we also have a very cool "style tuner" which lets you explode the range of your prompts hugely. In the last few months, we've also upscaling (4k images), "zoom-out" + pan functions, allowing you to start with a portrait of a football-player (for example) and infinitely zoom out to see an entire stadium. MJ 5.2/5 also brought an even higher quality of images. I'm very impressed! ~~90% of the images on my site are done with MidJourney. It is simply the best tool for graphics out there.~~ Sorry Midjourney, but last month saw the release of DallE (now in Chat-GPT) and this is now my longest time away from MJ (the images on my sales page were now done by DallE). Since MJ costs $10/$30/$60 per month and DallE 3 is now included in GPT-Plus ($20 per month), MJ has now been pushed down my list, losing a spot for the first time in 2023. If you only have $20 per month to spend on AI then definitely get GPT-Plus and use DallE. Until MJ step their game up, it's now an optional extra... PS. If DallE is pushing you away from spending extra $$ on a backup AI image tool, then some extra honorable mentions - https://www.bluewillow.ai/ which isn't quite as good as MidJourney but works very similar, uses the same prompting system and has one big benefit - it's free! Leonardo AI is also excellent (https://leonardo.ai/) with some very very nice presets, and the ability to train your own image model with as little as 10x prompts. A shame that Leonardo didn't get to stick around in the top 10, but competition is tight!

5. **Runway ML- https://runwayml.com/ <mark>*UPDATED*</mark>**
In November RunWay added "inpainting" which lets you add motion to specific parts of images. Very cool and puts Runway up a notch in my top list. Note - both video creation tools. Runway's "GEN-1" feature and Kaiber both let you upload a video (eg from a stock photo website like Pexels) and then enter a text prompt or image to style your video. Runway now pushed "GEN-2" which lets you do "text to video", creating an entirely new video from a few words! All my sales videos now use both Kaiber and RunWayML. Runway now also has "image to video" along with additional controls (zoom in/left/motion speed etc). Runway also also MANY different features I've barely had time to play with (like the green screen background removal and interpolation which merges images into a seamless transition). Also, Runway now has a VERY cool "image to video" function in its GEN2 tool which turns any image into a 4 second video. Then run the same video in its "slow motion" feature (at 0.33 speed) to create a high-res 12-second video (this also improves the resolution!). Runway dropped a place this week since some functionality is now in Canva, which has risen a place. Oh, and before I forget, for more text and image to video, check Pikalabs.

6. **ElevenLabs - https://beta.elevenlabs.io/voice-lab**
The best AI voice generation tool right now. Clone voices, create voices from scratch. Extremely powerful - especially when chained with something like Remixable Copywriter VSL script > ChatGPT remix it to new niche > Elevenlabs voice-over > Remixable video > Remixable website, to make pages and videos like this in around 1-2 hours.

7. **ClipDrop + StableDiffusionXL https://clipdrop.co/image-upscaler**
The simplest place to access Stable Diffusions's new "XL" model (text to image which is now close to MidJourney, although still a step behind). Also, though, Clipdrop has a whole suite of VERY useful AI image tools such as cleanup, text remover, remove background, image upscaler and more. Very often I'll get an image in MidJourney I love but it has text and a background I don't like - and MJ exports at 1024x1024. I will import into Clipdrop, remove the background, remove the text and then upscale the quality to 2000x2000.

8. **Canva AI + Magic - https://www.canva.com/ *UPDATED***
Announced a whole suite of AI tools in a big "create" event in the summer, and then in October 2023, integrated some more "photoshop-like" features (generative extend, animations, RunWay ML integration). VERY powerful when combined with MidJourney (create in MJ, edit in Canva AI). Their "AI Image Editor" is exceptionally good and provides the 2nd best inpainting after Photoshop. Simply import an image, click "edit image", choose the AI editor and then enter a command (eg "put glasses on robot"). AI feature only available with their pro plan ($10 month) and it only allows 100 edits per day. Trust me, I found out the hard way! CanvaAI has now dropped a space (owing to Photoshop AI), but CanvaAI's inpainting is still very good - just not on the insane level of Photoshop (plus its ⅓ the price of PS!). Canva is also 100x easier to use than Photoshop and so has now risen a space in my top 10 as a "newbie to intermediate user's better alternative to Photoshop". I am impressed at the Canva team's obsession with product iteration, especially vis-a-vis AI!

9. **Adobe PhotoShop AI -**
https://www.adobe.com/uk/products/photoshop/generative-fill.html
With the release of Photoshop AI (and specifically its "generative fill" feature). Simply highlight an area & type ("red hair"), and watch as the AI spits out three variation images. It's also very powerful at extending an image. eg. take an AI image you made with MidJourney (or any stock photo), let's say of a basketball-playing robot - then extend your image with an empty space either-side and type "basketball playing robots", and watch as the AI extends your 1:1 image into a 3:1 masterpiece. Only downside? It's $30/month. But.. it does come with a trial. If you do any image editing though, this is an

instantaneous must-have. It launched right in at #4 as soon as it went live, but has now been pushed down by MidJourney introducing a "zoom" feature with version 5.2 in late June. Note: if you work with "AI images", like me, I recommend the AI tools here. But if you work with a lot of "real photo graphics" then Photoshop is great. I also do a lot of editing in Photoshop (ie make an image in DallE or MJ then update it).

10. **StableAudio https://stableaudio.com/generate** ==*NEW*==
The latest tool from the "StableDiffusion" crew (the original text to image model). But this one lets you create royalty-free audio. Is nothing sacred to AI? No! Now you can create songs, beats, samples, sound effects even short acapella vocal sounds. I also use Facebook's "AudioGen" and "MusicGen" although you will need to check HuggingFace for a "space" running that (I may soon be using these engines in our own tools, but for now check out Stable Audio!)

(PlaygroundAI https://playgroundai.com/ + Leonardo AI- https://leonardo.ai/ now knocked off the top ten! Last time to check them before they disappear for good from my list, although both may return as they are excellent tools!)

7. Getting The Best From AI In 2023/4

There are a number of AI tools that I use (well, I use them all!) But the two in particular I recommend are Chat-GPT and MidJourney. Also... Photoshop (image editing is vital for designers and image editors & ElevenLabs for content/sales videos (for voice). Plus,, LeonardoAI (images), PlaygroundAI (images), BlueWillow (images) & ElevenLabs have **free** plans. If you're on a budget, here are my recommendations...

SOMEWHAT LIMITED BUDGETS...
👉 *"I have no money at all"* - get Chat-GPT and use Bing Chat. If...
👉👉 *"I can only afford $20/month"* - get Chat-GPT Plus and get BlueWillow or StableDiffusion/Clipdrop instead of MidJourney
👉👉👉 *"I can only afford $30/month"* - get Chat-GPT Plus + MidJourney basic plan

SERIOUS ABOUT MONEY MAKING...
💪🤖👉 *"I am serious about AI, and want the best"* 👉 first get Chat-GPT Plus. Then get Remixable AI (see below). Next, get MidJourney. Next, get either Adobe Photoshop AI or Canva Pro (to access the AI inpainting and editing of images). FInally, consider Runway ML or Kaiber AI for video. Use all these tools & stay subscribed - I'm hearing of big updates later this summer! ☀️☀️

8. Final Thoughts

Be sure to check out **Remixable**, my marquee software.

Remixable is the all-in-1 software I used to build ALL pages + videos for Infinite AI! Everything was built with Remixable, Chat-GPT, MidJourney, ElevenLabs, CanvaAI, Dall-E, ETC.. Exactly as described in the Remixable training videos!

Basically, Remixable + AI is how I did ALL of the funnel!

- Check out Remixable (now with AI preloaded) here

- Check out the "How I made $65k webinar here"

OK, keep your eye on your email. Big updates dropping - November 2023 & beyond!

Thanks, Chris

P.S. Agent X ;-) You heard it here first…
